5 glasses in 1

The world's first fully interchangeable glasses.

FLiPO is the first brand of fully interchangeable prescription glasses. FLiPO lenses are made from CR-39 organic material, ensuring exceptional quality and durability.

Made from an incredibly innovative material, FLiPO glasses allow you to change their style and function, offering 5 glasses in 1. Best of all, you can swap out the temples! Adapt FLiPO glasses for every occasion.

We produce eyeglasses, single-vision lenses, progressive lenses, and occupational lenses.

The progressive lenses we offer are manufactured in Japan by our supplier, a globally recognized leader in lens production.

We are the first brand to sell modular glasses online through our website (flipoeeyewear.com).

How do FLiPO glasses work?

FLiPO lenses are always tailored to the customer's requirements and are extremely easy to use:

Choose your frame

Designed for all types of audiences.

Add functionality

Solar | Shield protection | Night driving

Add colour

Wide range of accessories and endless possibilities.

Materials

Ultra-light glasses made with high-tech materials.

Our glasses and accessories are made with TR90 or Polyamide, an extremely lightweight material produced with W2050 nylon resin.

Thanks to this high-tech material, the glasses weigh less than half as much as frames made from acetate or other materials.

TR90 is a material widely used in the field of aeronautics.

- BENEFITS OF THE MATERIAL -

Firmness and durability

Heat resistance

Non-flammable toxin-free

High tolerance to environmental stress

Resistance to cracking

Dimensional stability

QUALITY CERTIFICATIONS

FDA: Material used in the aerospace industry due to its high resistance to high pressure.

ECO: Environmentally friendly production.

Temperature: Resistance to temperature changes up to 180 °C.

Hypoallergenic: Material used in surgical instruments.

Black Frames

NILO FRAME

SKU 0100001

Inspired by contemporary architecture and geometric precision, the Nilo frame combines the best of modern design with a touch of classic elegance.

Size: 52 19-144

IVY FRAME

SKU 0100003

Inspired by classic elegance and sophisticated simplicity, the Ivy glasses blend the best of vintage design with a modern twist. Every detail has been meticulously crafted to offer eyewear that enhances both your vision and your new style.

Size: 49 19-144

SIENA FRAME

SKU 0100007

Siena redefines sophistication with its cat-eye design. Thanks to its shape, it provides a wide and comfortable field of vision.

The elongated and lifted edges create a visual effect that “lifts” the face, providing a more youthful and dynamic appearance.

Size: 53 16-144

DANTE FRAME

SKU 0100005

With a slim, rectangular frame, Dante is much more than eyewear; it's a style statement. Ideal for those with oval, round, or heart-shaped faces.

Size: 52 17-144

Accessories

Design Clips.

The design clips are available for all frames and come with matching temples. The clips are made from ULTEM 9085, a material certified by the FAA (Federal Aviation Administration) as a high-tech polymer for use in the aerospace industry.

Functionals Clips.

All our sunglasses lenses are made of cellulose triacetate and are polarized. The US10 polarized lenses with UV400 protection are crafted from cellulose triacetate (CT), known for its high optical quality and polarization. They enhance visual clarity and reduce glare from reflective surfaces such as water or snow. Polarized lenses minimize glare and protect against sun exposure, providing a glare-free field of vision and natural color perception.

Screen Protection Clip

Lenses with an Anti-Blue Light filter designed to protect you from the harmful effects of blue light. Made with high-resistance polycarbonate, they offer superior optical quality for enhanced visual clarity.

Functional Design Clips.

Now you can choose the color and design of your solar clip, screen protection clip, or night driving clip—all in one.

Functional design clips consist of a lens and a design clip of your choice. To request a customized functional design clip, simply combine the two codes: first the lens code and then the design clip code.

Lens codes are available in the ERP form, as they differ from the functional clip codes, where the product is already assembled

HOW THE CODE IS FORMED

The first fully **interchangeable** Audio Tech Glasses

Redefine the way you listen, communicate, and express yourself with FLiPO — the tech glasses that allow you to enjoy your music, listen to podcasts, answer calls, and look great while doing so.

Experience the freedom of open-ear audio that allows you to listen to your audio content without blocking out the sounds of your environment.

Suitable for those people that don't feel uncomfortable wearing or using earbuds, have allergic skin conditions or hearing loss.

Connect FLiPO to your smartphone using Bluetooth, and enjoy instant access to Siri and Alexa anytime, anywhere, without blocking sounds from the environment.
